

Disaster Victim Identification – *International Forensic Odontology Course*

- A collaboration between the National Board of Forensic Medicine, Sweden, University of Oslo, Norway & Aarhus University, Denmark
- Conducted at Department of Forensic Medicine, Aarhus University, **Aarhus, Denmark**
- Event accredited patronaged by the International Organization for Forensic Odonto-Stomatology (IOFOS)
- **March 8 to March 12, 2027**

Built on a long tradition of Nordic collaboration within forensic odontology and disaster victim identification, the Disaster Victim Identification course at the Department of Forensic Medicine, Aarhus University, based at Aarhus University Hospital, combines theory with hands-on training in the Morgue. The course includes PM and AM registrations, a mock accident exercise, instruction in the KMD PlassData DVI7 system, as well as insight into a range of related disciplines. Teaching takes place in modern forensic facilities, with high-quality catering provided throughout.

Course Organisers:

Line Staun Larsen, DDS, PhD, Forensic Odontologist, Associate Professor, Department of Forensic Medicine & Department of Dentistry and Oral Health, Aarhus University, Denmark. President of the Danish Society of Forensic Odontology, Chief Dental Officer, DVI-team Denmark.

Rebecca Gahn, DDS, Forensic Odontologist, Department of Forensic Medicine, Swedish National Board of Forensic Medicine. Vice President of the Swedish Forensic Odontology Society, Chief Dental Officer, DVI-team Sweden.

Simen E. Kopperud, DDS, PhD, Forensic Odontologist, Associate Professor, Faculty of Dentistry, University of Oslo, Norway. Vice President of the Norwegian Society of Forensic Odontology, Chief Dental Officer, DVI-team Norway.
